**Data Recovery** across media

# State-of-the-art facility. Impeccable Service.

We live in a digital age - a time when our lives, personal and professional, are governed by smart gadgets and devices. Our dependency on these as individuals and businesses is absolute and even a small downtime is destabilizing—causing huge losses and severely impacting the system.

This warrants the need for world class servicing of these devices - expert, cutting edge and time bound to ensure there is no disruption in the routine.

Something that RLogic - a global leader in reverse logistics has specialized in over the years. Founded in Singapore in 1999, RLogic today has a presence in India, China, Singapore, Malaysia and Indonesia.

The company has long standing relationship with some of the world's leading Information Technology & consumer electronics companies. RLOGIC is also a founding member of Technical Services Consortium a worldwide network of reverse logistics companies.

In India, RLogic is present in Bengaluru, Chennai, Mumbai, Hyderabad and New Delhi with over 1400 employees.
